PROJECT REVIEW : MILESTONE PROJECT – 1

Date: 24-03-2026

Rational Expense Analytics Platform

SDG: SDG 8 - TrackWise: Analytics Platform

Presented By:

B.karthik Reddy – VTU24787 – Reg.No.23UECS1023

Courses Handling Faculty:

Dr.Hafizur Rahman – Assistant Professor

INTRODUCTION

1

TrackWise is a dynamic web-based application designed to help users track and analyze their daily expenses efficiently.

2

Managing personal finances manually can lead to errors and lack of insights.

3

This system uses database queries and web technologies to automate expense tracking.

4

It allows users to store, retrieve, and analyze financial data in real time.

5

The platform provides meaningful insights through categorized expense analysis.

6

7

It improves financial awareness and decision-making.

8

The system is scalable and accessible through web browsers.

9

It demonstrates real-world application of full-stack development.

PROBLEM STATEMENT

1

Many individuals rely on manual methods or basic apps to track expenses, which lack analytical capabilities.

2

This results in poor financial planning and lack of control over spending habits.

3

Existing systems may not provide structured storage or real-time insights.

4

There is a need for a simple, automated, and database-driven system.

5

The system should efficiently manage expense data and generate meaningful analysis.

6

It should also be user-friendly and accessible across devices.

7

Hence, a dynamic web-based solution is required.

8

TrackWise addresses these issues effectively.

9

OBJECTIVE(S)

1

To design and develop a simple web application to track daily expenses.

2

3

To implement a system that stores and manages expense data using MySQL.

4

To improve financial awareness by analyzing spending patterns.

5

6

To create dynamic web pages for easy interaction with users.

7

8

To evaluate user expenses and generate basic reports

9

PROPOSED SYSTEM

1

User-friendly interface for managing expenses

2

Secure login and user authentication system

3

Add, edit, delete expense records

4

Categorization of expenses (food, travel, etc.)

5

Real-time data storage using MySQL

6

7

Data retrieval using optimized SQL queries

8

9

Analytical insights through summaries and reports

Responsive design accessible on multiple devices

PROPOSED SYSTEM ARCHITECTURE

Explanation:

Input: User enters expense details (amount, category, date)

Processing: Server processes request using PHP/Node.js

Database: MySQL stores and retrieves expense records

Output: Displays reports, summaries, and analytics on web pages

WORKFLOW

USER

[Login/Register]

[Expense Input Module]

[Processing & Validation]

[Database (MySQL)]

[Analytics & Reports]

[Display Output]

TECHNOLOGIES USED

Frontend: HTML5, CSS3, JavaScript (ES6)

Backend: PHP / Node.js

Database: MySQL

Tools: XAMPP / Apache Tomcat / VS Code

- :

Hardware/Software Requirements:

System with 4GB RAM minimum

Web browser (Chrome/Edge)

Local server (XAMPP/WAMP)

MODULE DESCRIPTION

1

Module 1: User Management

Handles user registration, login, and authentication securely.

2

3

Module 2: Expense Management

Allows users to add, edit, delete, and categorize expenses.

4

5

6

Module 3: Database Management

Manages storage, retrieval, and integrity of expense data using MySQL.

7

8

Module 4: Analytics & Reporting

Generates summaries and insights like total spending and category-wise analysis.

9

IMPLEMENTATION SCREENSHOTS

Login Page :

A login page allows users to securely access their account by entering their username and password.

It ensures authentication and protects personal data from unauthorized access.

9

Expense Chart :

The TrackWise Dashboard provides a clear overview of user expenses with a visual chart for easy analysis.

It helps users monitor spending patterns and manage their finances efficiently in one place.

7

Expense added!

Total Expense

Total: ₹ 2500.00

Your Expenses

8(B) Add Expense

The Add Expense page allows users to record their spending by entering amount, category, and date.

It updates the total expenses and helps track financial activities efficiently.

25	200.00	breakfast	2026-03-23	Edit	Delete
26	250.00	Lunch	2026-03-23	Edit	Delete
27	300.00	Lunch	2026-03-24	Edit	Delete
28	150.00	Dinner	2026-03-24	Edit	Delete
29	300.00	Lunch	2026-01-01	Edit	Delete
30	1000.00	Book	2026-05-04	Edit	Delete
31	300.00	Recharge	2026-03-01	Edit	Delete

Out Put :

This section displays a list of all recorded expenses with details like amount, category, and date.

It allows users to easily manage entries by editing or deleting them as needed.

Thank you
